Darcy (Lianrui) Sun

SOFTWARE ENGINEER | AI APPLICATIONS

lianruisun1020@gmail.com | 781-547-9615 | linkedin.com/in/darcysun | lianruisun.com

EDUCATION

New York University | Courant Institute of Mathematical Sciences | M.S. Computer Science — **Expected May 2027**

Worcester Polytechnic Institute | B.S. Computer Science | GPA 3.75/4.00 — Aug 2021 – May 2025

EXPERIENCE

StoryFlow AI, Inc | Astorie - AI Video Canvas — Aug 2026 – Present

Full Stack Engineer, Part-Time | Remote

- Shipped **80+ merged PRs in 9 weeks** part-time by running **parallel Claude Code/Codex agents** in isolated worktrees, with tests, Preview acceptance, and production smoke checks gating each release.
- Integrated **4 image/video generation models** (Nano Banana 2.1, FLUX 3, Seedance 2.5 Draft, Video Depth Anything) with gateway routing, pricing, and refunds; made new models ship via **one declaration**, not per-model branches.
- Packaged generation capabilities into **JavaScript and Python SDKs** for the public /v1 API, wrapping file upload, capability discovery, retries, and **idempotency keys**; CI runs both end-to-end suites against a mock server.
- Fixed charge/output mismatches in AI generation by splitting multi-image requests into **independent ordered jobs** with **idempotent refunds**, and made gateway admission **atomic** to stop duplicate capacity reservations.
- Rebuilt the content platform on **Next.js, Payload, and PostgreSQL**: one versioned publishing framework for 4 page types with **18-language editing** and background AI translation; migrated legacy pages with full history.
- Built an ingestion pipeline that published **27K+ prompt pages** with daily incremental sync (checkpoints, retries, manual-edit protection), then migrated **27,822 URLs** with 301 redirects and per-language sitemaps.
- Resolved production performance and data-loss issues: batched CMS media reads (**48 → 1 query** per page), split large canvas edits at the route limit so **200+ node drags** persist, and lazy-loaded image grids to cut memory.

Baidu AI Cloud | Intelligent Marketing — May 2026 – Sep 2026

AI Product Manager Intern | Beijing, China

- Designed **8 multi-agent workflows** and input/output schemas for **41 API-backed tools** for **Hogee**, an enterprise social-listening SaaS on Baidu AI Cloud's multi-agent platform, owning product planning through delivery.
- Built a **Python API validation pipeline** that partitioned requests by date window, enforced rate limits, retried failures, and checkpointed results, enabling keyword-level analysis of delayed and missing data.
- Authored **14 PRDs** (130+ requirements) and drove 6 initiatives to release; supported **5 POCs** and two **RMB 1M+ contracts** for a product processing ~50K items/day across 80+ sources.

Shangping | AI-Powered Restaurant Review SaaS — May 2025 – Aug 2025

Founder & Full-Stack Engineer | Beijing, China

- Shipped a **React/TypeScript and AWS** SaaS that drafts reviews with **DeepSeek-V3** grounded in restaurant metadata, dish attributes, and each diner's selections; pilots at 3 restaurants lifted review volume to **~2.8×**.
- Constrained generation with 70 curated few-shot reviews to avoid unsupported dish claims; tenant-configured menus, branding, and routing cut new-restaurant setup to **5 minutes**.

PROJECTS

InnoSpire Technology Limited | WPI Major Qualifying Project — Aug 2024 – May 2025

Project Lead & Full-Stack Application Developer | Worcester, MA

- Led a 3-person team to deliver a multilingual **React Native** accessibility app for blind and low-vision users, integrating camera, smart-glasses, and voice inputs; received WPI's Data Science Department **Outstanding Project Award**.
- Combined **GPT-4o** for online scene understanding with local **YOLOv5 and Phi-3 Mini via llama.cpp** for offline recognition, hazard alerts, and spoken feedback, keeping core multilingual accessibility functions available without network access.

SKILLS

Languages | TypeScript, JavaScript, Python, Java, C++, SQL
Web & Backend | React, Next.js, Node.js, FastAPI, React Native, Payload CMS; REST APIs, JWT
Data & Cloud | PostgreSQL, MySQL, MongoDB; AWS (Lambda, API Gateway, DynamoDB, S3), Vercel, Docker, GitHub Actions
AI & Agents | Claude Code, Codex (parallel agents, skills, worktrees); LLM integration, multi-agent workflows, tool calling, image/video generation APIs; llama.cpp, YOLOv5
