Darcy (Lianrui) Sun

SOFTWARE ENGINEER | AI APPLICATIONS

lianruisun1020@gmail.com | 781-547-9615 | linkedin.com/in/darcysun/ | lianruisun.com

EDUCATION

New York University | Courant Institute of Mathematical Sciences | M.S. Computer Science — **Expected May 2027**

Worcester Polytechnic Institute | B.S. Computer Science | GPA 3.75/4.00 — **Aug 2021 - May 2025**

EXPERIENCE

Baidu AI Cloud | Intelligent Marketing — May 2026 - Present

AI Product Manager Intern, Hogee | Beijing, China

- **Led product planning and delivery for Hogee's media-listening SaaS module**, part of Baidu AI Cloud's multi-agent digital-employee platform; supported four enterprise POCs while advancing product iterations for a module gathering and processing ~50K content items daily across 60+ social, news, official-media, and industry sources.
- **Developed a Python-based API validation tool**, automatically partitioning long-range queries into constrained time windows, enforcing rate limits, retrying transient failures, incrementally persisting JSON responses, and aggregating keyword-level volumes and failure details to trace missing or delayed data across provider and internal processing stages.
- **Designed the orchestration and execution specifications for a media-listening Agent**, mapping natural-language requests into structured intents across eight business workflows and defining 41 API-backed tool contracts.
- **Built functional React prototypes with mock API payloads** to validate complex page states and multi-step workflows.
- **Tech: React (TypeScript), HTML/CSS, Python, JSON, APIs, Postman • LLM Tool Calling, Agent, Prompt/Context Design.**

Shangping | AI-Powered Restaurant Review SaaS — May 2025 - Aug 2025

Founder & Full-Stack Engineer | Beijing, China

- **Built and deployed a restaurant-review SaaS** that transforms dish, tag, and rating inputs into editable copy for TikTok, RedNote, Dianping, and Meituan, using React, TypeScript, API Gateway, AWS Lambda, DynamoDB, and S3; piloted across 3 restaurants, with restaurant-reported review counts reaching ~2.8× pre-pilot levels.
- **Built a metadata-driven multi-tenant UI architecture** with a shared React application shell, using tenant configurations to dynamically control branding, menus, tags, content, and routing; enabled restaurant-specific experiences without separate codebases and reduced new-restaurant setup to 5 minutes.
- **Engineered a DeepSeek-V3 prompt and context pipeline** using 70 curated restaurant reviews as few-shot examples, combining restaurant metadata, dish attributes, and user selections to generate grounded.
- **Tech: React.js (TypeScript), HTML, CSS • AWS API Gateway, Lambda, CloudWatch • DeepSeek API (LLM)**

AYCG, Inc. — Jul 2024 - Aug 2024

Full-Stack Developer Intern | Remote

- **Built the React front end and FastAPI backend for an internal admin portal**, implementing JWT authentication, RESTful CRUD APIs, and MySQL data persistence on Alibaba Cloud RDS.
- **Refactored the front-end codebase**, removing 700 lines of redundant code and reducing initial page-load time by 35%.
- **Tech: React (TypeScript) • FastAPI (Python) • MySQL • Alibaba Cloud (RDS) • JSON Web Token (JWT) • REST/CRUD**

PROJECTS

InnoSpire Technology Limited | WPI Major Qualifying Project — Aug 2024 - May 2025

Project Lead & Full-Stack Application Developer | Worcester, MA

- **Led a 3-person engineering team** to deliver a multilingual Android accessibility app and source code for blind and low-vision users. The project received WPI's Data Science Department Outstanding Project Award.
- **Built the React Native app** with camera and smart-glasses inputs, voice commands, and spoken feedback in four languages.
- **Designed and evaluated dual-mode inference** using GPT-4o for online scene understanding and YOLOv5 with Phi-3 Mini via llama.cpp offline, measuring 99.07% average speech-to-text accuracy across the perception-to-speech pipeline.
- **Tech: React Native (TypeScript), Expo, Android Studio, SST&TTS • OpenAI API (GPT-4o) • llama.cpp • YOLOv5**

WPI rating dashboard of healthy classroom website | Interactive Qualifying Project — Aug 2023 - May 2024

Project Lead & Full-Stack Application Developer | Worcester, MA

- Developed a React dashboard that streams data from 10 Awair Omni sensors via AWS Lambda and stores data in S3.
- Applied data-virtualization to large datasets, cutting initial load time and ensuring smooth real-time visualization.
- **Tech: React Native (TypeScript), Expo, Android Studio, SST&TTS • OpenAI API (GPT-4o) • llama.cpp • YOLOv5**

SKILLS

Programming | TypeScript, JavaScript, Python, Java, C++, SQL, HTML/CSS

Web & Frameworks | React, React Native, Node.js, Express, FastAPI, Vite, Expo, RESTful API design, Auth0, JWT

Cloud, Data & DevOps | AWS Lambda, API Gateway, DynamoDB, S3, CloudWatch; MySQL, MongoDB, Docker, CI/CD

AI & Tools | OpenAI API (GPT-4o, GPT-4o mini), DeepSeek-V3, llama.cpp, Phi-3 Mini, YOLOv5, STT/TTS; Git, Linux, Postman
